

PEDIATRIC UROLOGY SUBSPECIALTY CERTIFICATION CME REQUIREMENTS

Candidates for pediatric urology subspecialty certification must demonstrate their involvement in continuing medical education by documenting 30 pediatric urology focused Category 1 CME credits within the two-year period prior to the CME deadline of their pediatric subspecialty certification process.

Documentation of the requisite CME hours must be sent to the American Board of Urology office by December 1 in the form of notarized copies.

Category 1

Category 1 CME may take a number of forms, though the most relevant for practicing surgeons are *live or attendance-based activities and enduring materials*.

Live or attendance-based activities are CME activities that physicians must attend in order to receive credit. They may range from national conferences (such as the AUA annual meeting) to local workshops, seminars, grand rounds, or departmental scientific meetings.

Enduring materials are printed, recorded, audio, video, and electronic activities that may be used over a time at various locations, and that in themselves constitute a planned CME activity. The SASP program is an excellent example of such an activity.

Upon completion of a Category 1 CME activity, the participant can expect to receive notification of credit earned and documentation from the sponsoring organization.
